### Kratek opis

Vibration damper with 300 mm PVC workshop hose, plug I.D. 19, G 1 ET, pressed, max. 15 bar, Temp. -20 °C to 60 °C  
When using pulsating tools it is recommended to observe the standard ISO 6150, § 7.1.

It recommends installing a minimum 300 mm long, flexible hose between the pulsating tool and the quick-connect coupling.

The oscillating forces are taken by the hose piece and thus increase the service life of the quick-connect coupling. No warranty can be made for couplings mounted directly on pulsating tools.
