## Tlačni regulator DRV 225, Visokotlačna izvedba, G 2, 1.5-20 bar

Kategorija: [DRV 225 pressure regulator, high-pressure type](#)  
Šifra: **101444RIE**

### Kratek opis

Pressure regulator DRV 225, High pressure design, non-reversible, incl. pressure gauge, G 2, Control range 1.5 - 20 bar

Diaphragm pressure regulators with non-self-relieving design and non-pressure-reduced single-seated valve. Very precise adjustment and good response characteristic because there are only a few moving parts and hence minimal friction.

Ideal for compressed air, nitrogen and other neutral, non-flammable gases, but only suitable for liquids with comparatively low flow rates.

### Tehnične Specifikacije

|   |                |
|---|----------------|
| Navoj                                   | G 2            |
| Ohišje                                  | Red brass      |
|   | 2.1096.01      |
| Tesnilo                                 | NBR            |
| Vzmet pokrova motorja                   | Grey cast iron |
| Min. krmilno območje [bar]              | 1.5            |
| Razmerje zmanjšanja max.                | 6:1            |
| Pretok KVS vrednost [m <sup>3</sup> /h] | 7.2            |
| Max. krmilno območje [bar]              | 20             |
| Max. vhodni tlak [bar]                  | 40             |
| DN                                      | 50             |
| D [mm]                                  | 70.0           |
| Max. temperaturno območje [°C]          | 75             |
| A [mm]                                  | 146.5          |
